State of Mission Report

NS1.37: Blue Rhythmic Storm (2024-2025)
Foundation for the Law of Time • www.lawoftime.org

New Sirius Cycle 37

The Blue Rhythmic Storm, Magnetic Moon 1, July 26, 2024, marks the 24th anniversary of the start of the Foundation for the Law of Time (FLT) as a non-profit 501(c) (3) established “for the study and promotion of the Law of Time, based on the Thirteen-Moon/28-day calendar and in tracking the biosphere-noosphere transition.”

Its purpose was/is to create and uphold a guiding vision for the evolution of the Law of Time as well as provide whole systems context as we navigate this unprecedented biosphere-noosphere transition. Of course at the time of its inception in 2000, much of the FLT vision was geared toward the 2012 date as an opportunity to shift consciousness.

We are in a very different time than the inception of the FLT on October 20, 2000 (1.13.4.3), Kin 185 in Portland, Oregon. We do not have the same luxury of “time” as in the past.

In preparing this State of Mission report, there have been considerable challenges in finding a window of concentration while keeping up with the rapid influx of outer duties and shifting 3D dynamics. There is much more that would have liked to unfold here, but felt it important to release this on the Blue Rhythmic Storm. (Side note: Layout appears better on computer than phone).

We are also aware that there's an overload of information, and people's attention spans are getting shorter and shorter. That being said, it felt a duty to capture some words and an overview about the State of the Mission of the Law of Time and where we are at in the biosphere-noosphere transition.

To briefly review, this knowledge was first put forth (along with all knowledge of the Law of Time) by the late visionary time wizard, José Argüelles/Valum Votan. He continuously generated visions that extend into the future that require building bridges backward through time.

Over the years, the Foundation has published numerous publications and graphics, calendars/synchronometers, organized events and meditations,

supported many projects, created yearly 13 Moon almanacs, and moonly newsletters.

In 2020 we released the [9-year vision map](#), of which we are now at the precise midpoint with the Blue Rhythmic Storm. *Special thanks to all of the kin and translators for your selfless and dedicated work spreading this knowledge over the years. It does not go unnoticed.*

Brief Review: Biosphere–Noosphere Transition

“The Noosphere is encoded with the multidimensional scale of the universal cosmic mind. Cosmos appears or is experienced differently according to the level of perception and intelligence that is perceiving.”

–Cosmic History Chronicles, Volume 1

The biosphere is the sum unity of all of life. The noosphere is the “mind sphere” of the planet, and can be thought of as the higher telepathic mind we live in, whether we realize it or not. It organizes reality based on the synchronic order. The noosphere is realized through self-reflective consciousness.

The stream of knowledge of the Law of Time actually began in 1987 with the Harmonic Convergence, which can be viewed as an enactment within the noosphere unconscious of humanity - the telepathic whole that resides in the earth's mental envelope.

Nothing is confined to a single, linear, either/or meaning in the noosphere. Instead, everything is perceived radially and understood through multiple sets of correspondence linking everything to everything else.

A key function of the Law of Time is to bring the noosphere out of the unconscious into the conscious field of awareness.

As we continue to undergo the biosphere-noosphere transition, it is important to recognize the key roles played by what we refer to as “whistleblowers” and truth-tellers. Their role to uncover hidden truths on various subjects is

necessary in clearing the path for people to consider alternate options, including the necessity to change timing frequencies.

For people to consider alternatives outside of their conditioning and actually make changes is generally preceded by a series of disillusionments about the world and their place in it.

In present time, many have expressed their feeling of an internal frustration, a feeling that the true reality lies just beyond their reach, in the fragments of memories trying to become conscious within them.

This dormant knowledge, striving to surface, creates a subtle yet persistent tension within. It is the sensation of knowing that there is something more, a deeper truth that remains just out of reach, waiting to be unveiled. These feelings are part of the noosphere attempting to become conscious through us. For more on the Noosphere see: *Manifesto for the Noosphere and Time and the Technosphere*.

Different Levels of Knowledge: Some Reflections

"Earth is a genre ... "Belief systems, believe it or not, are functions of time. What you believe defines the time you are living in. Any belief system is held in place by the calendar and sense of time in which it is encoded."

-José Argüelles/ValumVotan

Self-education is our individual responsibility.

It is important to understand our planetary situation within the context of the processes of cosmic evolution. In this process we, in our self-reflective consciousness, form an integral part.

All current institutions including political and military are functions of and embedded in a timing standard that has disharmony built into it. Many people are caught up in the various storylines of this world and forget that Earth is just one of many worlds.

This realization is overshadowed by the collective mindset operating in the 12:60 frequency, out of sync with natural cycles. This frequency creates a distorted lens that obscures the bigger picture and the memory of unity.

There are different levels of knowledge to the Law of Time.

The most fundamental (and therefore the most important level) is the 13-Moon/28-day calendar and the 12:60 and 13:20 timing frequencies, which distinguish between artificial and natural or organic Time, including natural mind meditation.

This includes the understanding of the role of calendars and how cultural conditioning is totally dependent on the calendar being used. This is foundational knowledge in the understanding of the rest of this work.

It must be reinforced that the 13-moon calendar is not just a harmonic frame of time; it's a vibrational key that opens unseen doors in the mind, connecting us to the vast web of synchronicity that underlies the physical world.

Daily use of the 13 Moon calendar increases the incidence of synchronicity, making you more in tune and perceptive to the interconnectedness of people and events.

“The mechanical clock, though evolved over many centuries, was perfected just after the Gregorian Calendar Reform of 1582 and promoted by Europeans as an example of the human triumph over nature. So it was that the human mind assumed as second nature its own invented time, encoded as a frequency that we have identified as 12:60, and unconscious mental ratio determined by the irregular twelve-month calendar and artificial 60-minute hour.

“The combination of these two factors in this one timing frequency have consigned historical man to a hopelessly debilitating mental disorder that is referred to as modern civilization, or nowadays postmodern. But postmodern is not yet post-historical.” —Argüelles, Time and the Technosphere, p. 108.

*“If we were to ask the brain how it would like to be treated, whether shaken at a random, irregular rate, or in a rhythmic, harmonious fashion, we can be sure that the brain, or for that matter the whole body, would prefer the latter.” —Itzhak Bentov, *Stalking the Wild Pendulum**

With the 13-Moon Calendar and understating of the two timing frequencies as a base, the other levels of this vast knowledge base may be gradually understood, inclusive of teachings on the Law of Time and the synchronic order, the biosphere–noosphere transition, and the advanced levels of telepathic visualizations, Cosmic History Chronicles and the most advanced level of the Synchronotron.

13 Moons of Peace and Noosphere: Brief Review

The [13-Moon Calendar Change Peace Movement](#) was created in 1994 by José and Lloydine Argüelles to spread the word about the 13 Moon calendar. The Peace Plan was implemented through the Planet Art Network (PAN). The PAN was founded in 1983, based on Argüelles vision of artists around the world telepathically involved in transforming the industrial-age environment into a colossal, global-scale work of art. The Roerich Banner of Peace was adopted as the official logo.

The Peace Plan served to lay a foundation and increase awareness of timing frequencies and in promoting the 13 Moon calendar worldwide. It also resulted in factions of all sorts, as with any Movement in a time of dissonance.

By 2004, the vision of the [Noosphere](#) as the next stage of evolution began to take precedence within the Foundation for the Law of Time. Noosphere II, the Great Experiment of the Law of Time, put forth by José Argüelles/Valum Votan.

The purpose of this project was to anticipate and simulate noospheric states of consciousness which also define the galactic order of reality and the means of communicating with galactic civilization ...”

Anchored in the 13-Moon/28-day calendar, the synchronic order provides a daily practice for experiencing the reality of the noosphere. This system

embodies a “lived mathematics” that aligns with Earth's natural cycles, connecting us to the greater Mind/Noosphere.

The concept of “lived mathematics” refers to the experiential understanding of time as a cyclical and rhythmic process. Instead of viewing time as a linear progression, the synchronic order demonstrates time as a series of interwoven cycles that reflect the natural patterns of the Earth. By living in accordance with these cycles, we can attune ourselves to the Noosphere.

Noosphere II also included the vision of CREST: the Centers for the Restitution of the Natural Mind, a network of meditation and telepathic research centers dispersed globally. For those who have land or are interested in community building or retreat spaces, now more than ever people are seeking sacred havens where they can temporarily immerse themselves in the new frequency outside of the 12:60 construct.

A Few Noospheric Considerations

“Noosphere is a mirror symmetrical inversion of the biosphere. Life is currently undergoing inversion, where external energy dependence will be replaced by internal energy cultivation. Noosphere is a cyclical inversion of the technosphere in the final stages of the biosphere cycle.” –José Argüelles

What does this mean?

This analogy implies that our current technological advancements are part of a larger evolutionary cycle. Just think from in the way future, even our most advanced technology is primitive. We have to cultivate the ability to project ourselves forward and backward through time in order to gain a broader perspective.

The idea that the noosphere is a mirror symmetrical inversion of the biosphere implies a profound perceptual shift in how life and consciousness operate.

In the biosphere, life primarily depends on external energy sources, such as sunlight and nutrients, to sustain biological processes. The noosphere,

however, represents a stage where internal energy cultivation becomes paramount: we become self realized generators of Source Energy.

This inversion is not merely a metaphorical concept but indicates a real change in our perceptual structure and mode of existence. This shift cannot be grasped by the conditioned mind. This shift aligns with a key precept of the Law of Time where "time as the evolution of consciousness."

Reflections of Preceding Civilizations

“By ignoring the spiritual dimension of human reality and continuing to reduce everything to matters of economics, the world will only spiral into greater and greater catastrophe.” — José Argüelles/Valum Votan

The early matriarchal, lunar/goddess-based societies lived in harmony with the cycles of the Earth. Virtually all non-Western cultures began as Goddess cultures. The life of each individual is valued. Machines create a dependency and addiction to speed. This is a key reason why many people find it hard to relax and are on anti-anxiety pills.

Because we live in this artificial time, we have created conflict between ourselves and nature and have institutionalized the conflict between ourselves and nature. The natural order is not at war with itself.

Civilizations collapse primarily due to falsifying facts and the corruption of truth. When truth is compromised, a society's very foundation becomes unstable, leading to its eventual downfall.

Examining our current civilization, we can observe striking parallels to the ancient civilizations of Mu and Atlantis just before their destruction and Maldek within our own solar system.

They are viewed as prototypes of a memory of cataclysm embedded in the human psyche. It is this memory that activated the transmission of the 7 Volumes of the *Cosmic History Chronicles*.

Our current society reflects similar patterns with the rapid advancement of technology, often without considering its ethical or biological implications. Then there is the mindless destruction of nature, and the misuse of power by political and religious leaders who manipulate the truth for their own gain. This contributes to growing inequality and social injustice as the gap between the rich and poor widens, resulting in a culture of greed and competition.

This is further compounded by the misuse and exploitation of life force, which leads to moral decay, and the objectification and degradation of human sexuality, which our creative energy.

Additionally, the spread of misinformation, particularly with the use of advanced artificial intelligence, creates confusion and division among the people.

Overall, this erosion of values disturbs the collective psyche and leads to widespread mental and physical unrest. All of these issues can be seen as replays of unresolved karma from other times and worlds. "History repeats itself" (until the Dreamspell of History is finally broken).

Current Projects

The FLT has recently released the annual [13 Moon Star Travelers Almanac](#) as well as a [free pocket calendar](#). In addition, we have launched the Noosphere Nodes project, of which a report on this project will be available in the Lunar Moon.

We are also working on a comprehensive and definitive guide to the Holomind Perceiver, which was the final work left by José Argüelles. This guide aims to compile all the knowledge in one place, including unpublished material. This will be handy to print in case of Internet outage. Additionally, we have a new book on the Noosphere in progress.

We have also created a Cosmic History website cosmichistory.love. This website includes a subscription-based area: [Inner Time](#), which is for those who want to delve deeper, support the evolution of this work, and stay connected. On that site, you will find a lot of knowledge, including the evolving 260 days of

Time Magic, the Seven Keys to Cosmic History video series, meditations on each of the *21 Galactic Archetypes*, and more. We continuously add new content, with much more in the works.

While the FLT site is more focused on the collective, the Cosmic History site is focused on self-study and the awakening of the individual. Noting that the collective must first be realized in the individual. *"May wisdom ripen in us, so we may know all from within."*

We are working on a few other key projects that will be announced later. These projects have been done by just a few people with a rotating wave of volunteers and very minimal Moonly support. We rely primarily on book and almanac sales and occasional workshops to keep the work going. We have done our best to safeguard the sacredness of this work by not commercializing it.

The most important thing is to keep the knowledge living and evolving, in integrity to the Source, yet adapting and evolving the knowledge for the time we are living.

Founder and Creator of FLT, José Argüelles/Valum Votan wrote in a 2008 report:

"At its core the FLT is the manifestation of a sacred covenant, it is a fourth dimensional circuit, disguised as a third-dimensional non-profit corporation. Most people are not aware of this and it is generally nothing I ever make public. But this does not change the fact of its actual nature ... a sacred covenant is an expression of Truth Consciousness and Higher Mind. Invisible as the Truth Consciousness may be, it is what has kept the Foundation on track— despite all odds."

We are happy to see so many people spreading the knowledge of the 13 Moons and synchronic codes on social media and their websites! We ask that you please include a link to the Law of Time so people can trace the knowledge to its Source lawoftime.org and/or cosmichistory.love

The 2080-Day Psi Bank Cycle (2023 - 2029)

“Correlated with the sunspot cycles, the psi bank is shown to be a field of eight tzolkins in four sets of two in inverse relation to each other which straddle the globe in tandem with the electromagnetic field.”

-Rinri Newsletter: Volume 1, Number 7

The FLT put out a vision for the *Noosphere Nodes* to anchor and draw forth a new narrative within a 2080-day cycle. The [first report can be found here](#) along with the original vision. The Noosphere is the mental sphere of the planet that possesses an inherent intelligence system. The idea was to put out the vision and leave it to groups to form and be guided autonomously.

This 2080-day cycle was initiated on October 21, 2023: 1.36.4.4. (Kin 1) and continued to July 2, 2029: 1.41.13.6 (Kin 260). These days hold immense consciousness potential. This cycle is highlighted as a significant psi bank activation and memory retrieval period within the Noosphere.

This window of time was put forth in the 9-year vision map. 2029 is a pivotal year. This is followed by the 10-year cycle, which will lead to the completion of the first 52-year new Sirius cycle (1987 - 2039).

We began a pilot program for the first 260-day cycle on Inner Time. This initiated the first 260 days of Time Magic, unfolding in 8 "Spins" or 260-day Tzolkin cycles. The curriculum will continuously evolve, with periodic live streams to focus on different facets of this knowledge.

Psi bank is a key psychic tool of 2080 units. These are the registrations of the original Sirius transmission codes upon the Earth's orbit. Everything is contained in these codes or 2080 units.

The psi bank matrix creates an extended telepathic structure around our planet, coinciding with the electromagnetic field. This structure describes the telepathic field of the Noosphere, which continuously broadcasts signals.

For example, by tuning into the thought frequencies of different beings, we may receive transmissions from Sirius B, Arcturus, and other points of galactic civilization. :)

2080 days to Retrieve Lost Knowledge

Eight days before the beginning of this 2080-day cycle, NASA announced the launch of the Psyche mission on October 13, 2023, Kin 253. The spacecraft is expected to reach 16 Psyche's orbit in late July 2029 and fly by Mars in May 2026.

These dates coincide precisely with this **2080-day psi bank** cycle: 2023 - 2029.

The NASA Psyche mission is designed to study the Asteroid Belt and discover how Earth's core and the cores of other terrestrial planets came to be. This is interesting in light of the work of the Law of Time.

Their website states:

“Psyche is a NASA mission to study a metal-rich asteroid with the same name, located in the main asteroid belt between Mars and Jupiter. This is NASA's first mission to study an asteroid with more metal than rock or ice ... Psyche launched at 10:19 a.m. EDT from Kennedy Space Center. Psyche lifted off from Launch Pad 39A aboard a SpaceX Falcon Heavy rocket.”

(It is not that we are NASA advocates, but rather students of synchronic symbology).

The Psyche spacecraft is on its way to explore the asteroid that shares its name. The asteroid Psyche was discovered on March 17, 1852 (Kin 28), by Italian astronomer Annibale de Gasparis. It is located in the outer part of the main Asteroid Belt between Mars and Jupiter. This is the fifth orbit that was once a planet (Maldek).

The memory of the destruction of Maldek is the genesis point of Cosmic History, a prototype of cataclysm embedded in the human psyche. The fifth

orbit of Maldek is Bode number 28. (for more See *Cosmic History Volume 5: Book of the Timespace*).

In everyday language, "psyche" can refer to a person's inner life or mental state. In Greek mythology, Psyche is a mortal woman who becomes the goddess of the soul. Her story is a tale of love and transformation, where she undergoes various trials and ultimately unites with Eros (Cupid), symbolizing the soul's journey and its union with divine love.

Carl Jung's theory of the collective unconscious posits that humanity shares a set of universal symbols and archetypes embedded in the psyche. These archetypes can carry ancient wisdom and knowledge accessible through dreams, myths, and spiritual experiences.

Eight Cycles of 260 = 2080

Here are the dates for the beginning of each of the eight 260-day cycle, for a total of 2080 days.

The numbers before refer to the New Sirius Cycle. The 1 means it is New Sirius Cycle 1. The second number is the year in the 52-year Cycle of New Sirius Cycle 1. The third number is which of the 13 Moons we are in; and the fourth number is the day in that Moon.

New Sirius Cycle 1 began July 26, 1987, which was written: 1.0.1.1 (see graphic at bottom).

Kin 1: 1.36.4.4. October 21, 2023

Kin 1: 1.36.13.12. July 8, 2024

Kin 1: 1.37.9.19. March 25, 2025

Kin 1: 1.38.5.26. December 10, 2025

Kin 1: 1.39.2.5. August 27, 2026

Kin 1: 1.39.11.13. May 14, 2027

Kin 1: 1.40.7.20. January 29, 2028

Kin 1: 1.41.3.27. October 16, 2028

Kin 1: 1.41.13.7. July 3, 2029

This 2080-day cycle concludes on Kin 260: 1.41.13.6. July 2, 2029. When we add one 23-day (solar biotelepathic cycle) we arrive at the Day out of Time, Kin 23: July 25, 2024: the conclusion of the 9-year vision map.

The 13 day Wavespell is a fractal of the 260-day Tzolkin. $13 \times 20 = 260$.

The 260-day Tzolkin is a fractal of the 2080-day psi bank. $260 \times 8 = 2080$.

Psi bank is the cosmic registry and storage unit of the Earth's evolutionary timing programs. It is correlated with the sunspot cycles (see *Earth Ascending and Rinri Project*).

The **psi bank** is the nervous system of the Noosphere (planetary mind). The Noosphere is directly related to the electromagnetic field of the Earth. Holomind Perceiver "perceiving with the whole mind", is the sensing device of the Noosphere.

28 Year Cycles

In the 28-year cycle, we can observe symmetry between the 7 years of prophecy. One approach is to examine each of these 7 years in relation to the 28-day cycles before and after.

The book: *Time, Synchronicity and Calendar Change: the Visionary Life of José Argüelles.*, goes through each of these seven years, and is a good starting point in understanding the knowledge that was seeded on this planet at that time.

The seven years of prophecy began in 1993 with the reception of the Prophecy of Pacal Votan. This prophecy (in the mind's trajectory of the Galactic Maya) is carried through telepathic understanding of the numbers that create the celestial harmonics of the synchronic order. When understood, these numbers become telepathic vehicles.

You can use these 28 year cycles to do your own study.

For example, we might note that the culmination of this knowledge was given at the 49-day Earth Wizards seminary in Picarquín, Chile that took place in 1999. The analphs of this event will cycle back around in 2027.

In distinguishing the Seven Years of Prophecy, 1993-2000, Magnetic Seed-Resonant Wizard years, we can study the 28-year cycles on either side of it.

Study these dates and what occurred and find the synchronic simultaneity of each of these sets of three, 28-day intervals. Look for patterns. If the date is in the future, project yourself there.

2021 = **1993** - 1965
2022 = **1994** - 1966
2023 = **1995** - 1967
2024 = **1996** - 1968
2025 = **1997** - 1969
2026 = **1998** - 1970
2027 = **1999** - 1971
.....
2028 = **2000** - 1972
2029 = **2001** - 1973

Also, if we study this process, we see that 2039 is 28 years from the passing of Valum Votan in 2011. (Incidentally his birth year is 1939).

July 25, 2039, Kin 33, concludes New Sirius Cycle 1. New Sirius Cycle 2 commences the next day with the White Galactic Wizard, written: 2.0.1.1.

"It takes 28 years for the Gregorian calendar to run through its cycle of permutations. Every 28 years, like a phonograph record of time—a chronograph—the Gregorian calendar guides its users through a mentally debilitating construct of unevenly measured and irrationally named months, paced by a system of 7-day weeks that bears little relation to the lengths of the months or years ..." —José Argüelles, *Time and the Technosphere*

19 Code

Since we are in the Solar Ring of Kin 19, we are reminded that the vigesimal mathematics of the 13:20 frequency is known as the 0- 19 code, written with a simple dot-bar notation.

The 19 code also underlies the entire structure of the Quran, as first discovered by Dr. Rashad Khalifa. This was a key theme of Mother Tynetta Muhammed, who wrote a regular column, Unveiling the Number 19, in the Final Call newspaper.

In this number set, which also demonstrates the mathematics of the radial matrix, there are ten pairs of numbers radially arranged, each pair adding up to 19.

$$0 + 19 = 19$$

$$1 + 18 = 19$$

$$2 + 17 = 19$$

$$3 + 16 = 19$$

$$4 + 15 = 19$$

$$5 + 14 = 19$$

$$6 + 13 = 19$$

$$7 + 12 = 19$$

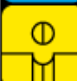

$$8 + 11 = 19$$

$$9 + 10 = 19$$

“All is number. God is a number. God is in all.”

—Dynamics of Time, Postulate 19:13

The gate for the completion of the Great Cycle of Prophecy was opened 34 days after the summer solstice (N. Hemisphere) 1987, on Kin 34—White Galactic Wizard. This began the New Sirius Cycle 1, a 52-year cycle of which the first one concludes in 2039; then another one starts, and concludes in 2091 and the next one in 2143, etc.

As shown in the table above, each year is coded by one of four year bearers: Wizard, Storm, Seed and Moon. The year always starts on 26 July and completes on 24 July, with the Day out of Time being 25 July. “NS1” indicated New Sirius Cycle 1, the years are numbered NS1.0–NS1.51 for a total of 52 years. The count begins in the upper-left corner with the year of the White Galactic Wizard (Kin 34), numbered NS1.0—this indicates that 0 years have completed since the start of New Sirius Cycle 1, hence NS1.0. The last year of New Sirius Cycle 1 is the year of the Red Resonant Moon (Kin 189), numbered NS1.51, after which will begin New Sirius Cycle 2 (NS2).
